THEORETICAL ACTIVITY.

"Lady," said Plodding Pete, "have you any wood you want chopped?"

"Yes, indeed."

"How much?"

"There's about half a cord that you can start on."

"Don't you want an axe?"

"No, I'm representing the Association of Industrious Inspectors. The secretary wants me to turn in a report on how much wood-chopping there is to be done in this township. It'll make a right interesting paper to read at our next meetin', an' maybe we can think up some way o' gettin' it chopped."—Washington Star.

## WILLETT & GRAY'S LETTER ON SUGAR SITUATION AUGUST 27

Willett & Gray's late sugar journal has the following to say regarding the very interesting sugar situation as of August 27:

CUBA CROP.—Special cables received by us from Havana, Cuba, August 21, 1914: "Rain is wanted; 3 Centrals grinding, against 6 last year and 5 in 1912."

LOUISIANA CROP.—Slightly drier and cooler weather than for some time prevailed during the past week but still there was plenty of precipitation for present crop needs. Fair field yields are expected this fall. The Louisiana Planter reports that Cypress and Lockport Central will make white sugar.

Temperature at New Orleans—Maximum, 90 deg.; minimum, 74 deg. F.

LOUISIANA CROP.—A prominent planter writes us under date of August 22, 1914: "Acting upon the advice of government officials and newspapers to diversify their crops, the planters of Louisiana plowed out or abandoned thousands of acres of good cane; other thousands of acres were very poorly worked and scarcely any fertilizer was used, owing to the fact that very few planters had money or could borrow money to work their crops. The majority of those who had money worked their crops either with the greatest economy or in a half-hearted manner. Very little cane was planted, and land in an ordinary year that would have been put in cane, was planted in rice, corn and garden truck, or left to grow up in grass or weeds."

As a consequence, the tonnage of Louisiana, in cane, will be very short and I doubt if the sugar output of the state for the year 1914 will be more than 150,000 tons. Due to the fact that the majority of sugar planters will make good sugar, fit to go into immediate consumption, there will be 25 per cent of this amount made into seconds and thirds, which will not be available during the grinding season, and this will leave only 140,000 tons of the Louisiana crop to come on the market during the months of October, November and December.

SAN FRANCISCO, Cal., August 21, 1914.—At the opening of business, Monday the 17th, the California-Hawaiian advanced their list to 7.50c, making their terms the same as the Western Sugar Refining Co. There being no further advances in raws, the demand steadily down to shipments and regular requirements against contracts.

Today, following a decline of 50c raw sugar in Liverpool has been taken over by the government for refining purposes.

6,000 tons American granulated August shipment have been sold this week to London, freight 25c.

40,000 tons Java are to be shipped to United Kingdom, freight August, 40s, September 35s paid.

6,000 tons Cuban prompt shipment sold to United Kingdom, freight 25c. Business done in White Java August-September about 22s c. i. f. United Kingdom.

American granulated prompt sold up to 27s 6d c. i. f. including war risk. August 14, 1914.—Sugar.—The situation is unchanged, and sales continue to be restricted. 300 bags crystallized Demerara sold 25s.

The following charters for sugar have been made, a steamer 5,000 tons Mauritius for London at about 30s, 5,500 tons Java September 37s 6d, and a steamer from Cuba at 30s prompt.

Two cargoes of Manila arrived at Gibraltar have been redirected to United Kingdom ports.

TARIFF.—Present United States duties on imports of sugar according to polariscopic test: On 96 deg. test Foreign, 1.25c and 100 deg. test Foreign, 1.35c; on 96 deg. test Cuban, 1.0048c and 100 deg. test Cuban, 1.008c per lb. For each degree up or down from the above tests there is an allowance of .026c per lb. for foreign raw and refined and .0208c per lb. on Cuban raw and refined.

Number 16 Dutch Standard color test is eliminated.
